• Sound pressure level: 101 dB(A) Lp A

• Revolutions per minute: 0 - 1800

#### Do you know - Li-Ion batteries:

- Do not have any memory effect
- Consist of cells with 3.6 V each
- After full charge they have a higher voltage than 3.6 V i.e. 5 cells each 3.6 V = 18 V but after full charge a peak voltage of up to 20 V is possible

Attention: For a longer lifetime of the battery please store it charged up to 50 to 80 % only

- Have an energy density which is twice as high as nickel cadmium batteries, for example
- Have a nominal voltage three times higher than a nickel metal hydride battery
- Require multiple complete charging cycles to reach full capacity
- Number of tools: 4
